Systems, Functional Data, and Methods To Pack N-Dimensional Data

## Abstract of the Disclosure

Devices, systems, functional data and methods are provided for packing ndimensional data. The navigational device with n-dimensional data packing
capabilities includes a processor communicating with a memory. Packing ndimensional data within one or more coordinate data. Each coordinate data includes
n-dimensional data and a control data. The control data are operable to determine
which n-dimensional data are active within the coordinate data. Furthermore, each
coordinate data are compressed or packed.
